Power Factor Adjustment

The consumer agrees to maintain unity power factor as nearly as practical. The Cooperative may install power factor metering devices at its discretion. Demand charges will be adjusted for consumers with 50 kW or more of measured demand to correct for power factors during any period of fifteen consecutive minutes is lower than 90%, and may be so adjusted for other consumers if and when the Seller deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the power factor during any period of fifteen consecutive minutes is less than 90% lagging.

Minimum Monthly Charge

The minimum monthly charge shall be the higher of the following charges as determined for the consumer in question:

- (1) The minimum monthly charge specified in the contract for service; or
- (2) A charge of \$1.75 per kVA of installed transformer capacity.

Note: Minimum does not include power cost adjustment.

Delivery of Primary Service

When a customer taking service at voltage of 14,400 and above and in excess of 750 kVA, furnishes his own transformer and substation equipment, and receives delivery of electricity at primary voltage metering, a discount of 3% shall be allowed on monthly bills for primary metering. The 3% discount will not be allowed on the purchased power cost adjustment that is shown separately on this bill.

The Cooperative shall have the right to approve of transformers and substation equipment furnished by the consumer under this type of service.

Tax Adjustment

The Cooperative is authorized to collect and pass on, by adding to the bill to the consumer, the applicable proportionate part of any taxes or government impositions which are or may in the future be assessed on the basis of the gross revenues of the Cooperative and/or the price or revenue from the electric energy or service sold and/or the volume of energy purchased for sale and/or sold hereunder.

Purchased Power Cost Adjustment

The Cooperative shall, if purchased power cost is increased or decreased above or below the base purchased power cost of \$0.066160 per kWh sold, flow through such increases or decreases to all classes of consumers.
